My kids would say our family money story is...

Where do your teens get their money?

Possible outcomes of my teen's money story are...

I grew up believing money...

I would like my kid's money story to be...

Four Money Choices Worksheet

Success with money is best achieved with systems and discipline, but your systems do not have to be hard to follow; they can be simple and easy. Without a system your money can either get spent too quickly on things that do not really matter, or you might save so much that you miss some of the enjoyable experience money can pay for.

Before you make commitments to any of The Four Money Choices, think through why you would put money into each category and how you will do it regularly. Here are some things to think about:

SPEND What do you spend your money on? What things are most important to you? On what do your parents expect you to spend your own money? What do you do when you do not have enough money to buy what you want?

SAVE Why do you want to save money? What are your savings for? How will it make you feel to be successful at saving? How will you make sure you save some of your money every time you get your allowance, earn money or get some as a gift?

INVEST Investing usually means you are willing to take the risk of losing money in exchange for the potential of earning more return on your invested money than you will get in your savings account. Consider that carefully when choosing an amount to invest.

SHARE Why do you want to share money? Who do you want to give it to? How and how often will you do this?

Use this chart to create your own system for dividing your money into The Four Money Categories.

Four Money Choices	How much?	Why?	How?
